* For HVLP Guns - Always check for 10 lbs. at the air cap using the appropriate air cap test kit.						

Notes:

- 1) For Areas of high humidity and/or cooler temperatures, smaller tip sizes may be a better choice.
- 2) When adjusting the fluid needle, start at the mid-range that is listed and then adjust a 1/2 turn on the needle in or out until you get the fluid delivery that fits your application speed and environmental conditions.
- 3) For the pressure adjustment, start at the mid-range and then adjust up or down on the pressure to get the desired atomization for your application speed and environment.
