

Sherwin-Automotive Training

Mission Statement

It is the goal of the Automotive Training Department to provide our customers, distributors, and employees with the most up-to-date information on products, procedures, and trends in the automotive refinish market. This information is designed to enhance the student's productivity, quality, and future success.

We will accomplish our goal by understanding our student's needs and developing classes, which address those needs. We will utilize a balance of classroom based, multi-media presentations, the latest technologies such as iPads, interactive classroom discussions, and practical hands-on experience.

Training Specialists specially chosen for their unique balance of presentation skills, technical expertise, and ability to share ideas will monitor all aspects of training.

Evaluation techniques will be utilized throughout our classes to monitor not only the learning progress of the students, but to provide immediate feedback to the instructor relative to their performance.

Our hope is to provide our students with the best possible learning experience.
